**Life Jacket Solutions**

**EST 2021**

# **J.M.Gillies is proud to introduce its PFD range, manufactured and designed to the latest standard AS4758.1 2015.**

## **RESPONSE by Life Jacket Solutions**

We have spent many months designing and putting together our new range for 2021 working alongside Life Jacket Solutions.

Safety is our focus and the most important piece of equipment that you will ever need in and around the water is a high quality life jacket. At Life Jacket Solutions we have over 20 years experience in the PFD/Life Jacket industry so we know safety is of the utmost importance, but there is no need to sacrifice comfort.

In the range is basic Level 100 jackets, Neoprene and water sports jackets through to the latest in inflatable jackets. Gillies has you covered with jackets from Boating, Fishing, Rock fishing, water sports , jet skiing, SUP and general pool activities.

All our Level 100 and Level 150 ranges have roll over. This means when a wearer is face down in the water the wearer will float back to a safe position within 10 seconds. Even the dogs have been looked after with 3 ranges of pet vests.

In the range we have all levels ranging from Level 50, Level 50S, Level 100, Level 150, Level 160 & Level 275.

## PRODUCT CERTIFICATION

**BSI Certified Product**

**Lic No: BMP 734926**

**Response life jackets are fully certified to AS4758.1 2015.**

The Response range follows months of rigorous testing, optimisation and design iteration. All of this is to ensure our life jackets perform to the highest Australian standards and can withstand the harsh Australian elements.

For sales enquiries contact - [sales@ljss.com.au](mailto:sales@ljss.com.au)

[www.ljss.com.au](http://www.ljss.com.au)

## Servicing

LJS inflatable jackets are self-service for recreational use. The LJS jackets can be self-serviced by downloading the form at [www.ljss.com.au](http://www.ljss.com.au) and completing the service report.

The LJS range of inflatables can be self-serviced every year for 5 years. On the 5th year it must be serviced by an authorised service agent.

For commercial use the LJS jackets must be serviced by an authorised service agent every 12 months.

Before each use check webbing, stitching, buckle, reflective tape and the whistle for any sign of damage or loss. These garments are not serviceable if any sign of loss or damage is detected, do not use jacket and replace with a new one.

## Washing Instructions

Wash in fresh water after use. Dry thoroughly, store in a dry ventilated position away from direct sunlight and harmful chemicals. Check Life Jacket regularly to ensure it is in good working condition.

**DO NOT  
MACHINE WASH**

**DO NOT  
TUMBLE DRY**

**DO NOT IRON**

**DO NOT  
DRYCLEAN**

**Warranty:** 12 months for fair wear and tear if care instructions are followed.

# Single Point Indicator Operating Systems

All LJS inflatables will have either Halkey Roberts or UML operating systems

## Halkey Roberts Operating Systems

### MANUAL - HALKEY ROBERTS SINGLE POINT INDICATOR

### Service Instructions

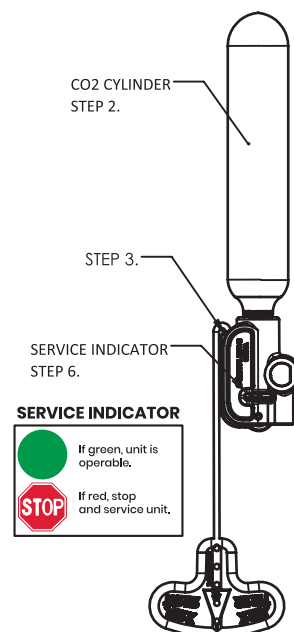

#### Product description:

The Pro 3F® Single Point Manual Inflator is designed for use on life vests where manual activation only is desired.

- Single point indication
- Easy and inexpensive to rearm
- Glass-reinforced nylons
- All metal components: Stainless steel for the marine environment

- STEP 1:** Unpack or open the life vest so that the manual/automatic inflator is visible.
  - STEP 2:** Remove gas CO2 cylinder by rotating cylinder counterclockwise then pull out. **Discard if cylinder has been punctured or is not within weight guidelines.**
- REARMING**
- STEP 3:** Rotate the yellow lever back towards the inflator so that it is flush against the grey body. The yellow lever should not be extending out from the inflator.
  - STEP 4:** Check the new cylinder to be sure it has not been punctured.
  - STEP 5:** Install new cylinder by engaging the cylinder threads with the inflator threads. Turn cylinder clockwise till a firm seal is achieved.
- WARNING: PFD WILL ONLY INFLATE IF CYLINDER IS TURNED TO FULL STOP.**
- STEP 6:** Check to be sure service indicator is **GREEN**.

www.halkeyroberts.com

MANUAL

### AUTO - HALKEY ROBERTS SINGLE POINT INDICATOR

### Service Instructions

#### Product description:

The Hydro 1F™ Manual/Automatic Inflator is designed for use on life vests where automatic inflation is needed

- Splash and humidity resistant
- Single point indication
- Easy and inexpensive to rearm
- Glass-reinforced nylons
- All metal components: Stainless steel for the marine environment

- STEP 1:** Unpack or open the life vest so that the manual/automatic inflator is visible.
  - STEP 2:** Remove gas CO2 cylinder by rotating cylinder counterclockwise then pull out. **Discard cylinder.**
  - STEP 3:** Remove cap by turning counter-clockwise.
  - STEP 4:** Remove bobbin from cap or housing unit. Discard bobbin (Yellow). Check the housing to be sure it is clear and dry.
- Note:** The bobbin (Yellow) body may remain in the housing unit or in the cap assembly when you remove the cap. The bobbin body must be removed prior to Rearming.
- REARMING**
- NOTE: Rearming must follow the sequence below.**
- STEP 5:** A new bobbin must be used. New bobbin must have been purchased within three (3) years. If bobbin purchase date is unknown, check date on bobbin, replace if over three (3) years.
  - STEP 6: IMPORTANT!** Bobbin (yellow) must be installed into the HOUSING (\*\*see figure), white side up, aligning the slots on the bobbin with the ridges inside the threaded housing. The bobbin will slide in easily if installed correctly.
  - STEP 7:** Install cap by screwing clockwise until it meets the housing shoulder.

**Note: No gap between the cap and the housing shoulder.**

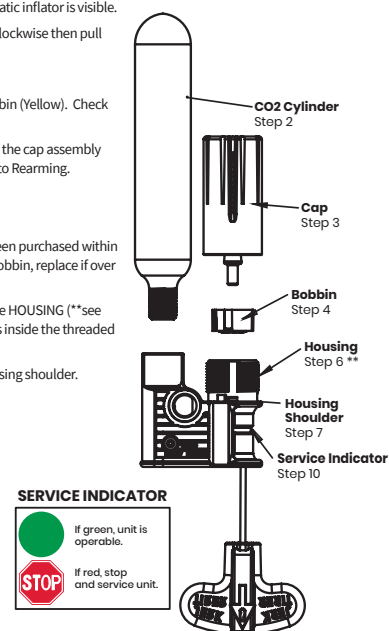

- STEP 8:** Check the new cylinder to be sure it has not been punctured.

**IMPORTANT!** Install the bobbin and cap before installing a new cylinder.

- STEP 9:** Install new cylinder by engaging the cylinder threads with the inflator threads. Turn cylinder clockwise till a firm seal is achieved.

**WARNING: PFD WILL ONLY INFLATE IF CYLINDER IS TURNED TO FULL STOP.**

- STEP 10:** Check to be sure service indicator is **GREEN**.

www.halkeyroberts.com

AUTO

## UML Operating Systems

### AUTO - UML OPERATING SYSTEM – PRO SENSOR ELITE

#### INDICATOR GUIDE

#### Pro Sensor Elite

#### How the Indication System Works

- This product provides additional improvement on the standard MK5, affording the user one point of status indication, to confirm that the unit has been automatically or manually activated. The unit also provides the added benefit of detecting if the CO<sub>2</sub> cylinder has been pierced, eradicating the possibility of accidentally fitting an empty gas cylinder.
- The Pro Sensor Elite® Automatic Inflator is only fully operational when both green indicators are fully showing green, water is not restricted to the Cartridge Firing Mechanism, the Automatic Cartridge is within its printed Replace By Date and a fully screwed in full CO<sub>2</sub> Cylinder in place.
- The indication system on the Pro Sensor Elite® Automatic Inflator allows the user to establish if the system has been fired including the added benefit of quickly identifying if a pierced CO<sub>2</sub> cylinder is accidentally refitted to the inflator during the servicing procedure.

**The Pro Sensor Elite® Automatic Inflator indication is only fully operational when both green indicators are showing fully and water is not restricted.**

### MANUAL - UML OPERATING SYSTEM – PRO SENSOR ELITE

#### How the Indication System Works

- The indication system on the Pro Sensor Elite® Manual Inflator allows the user to establish if the system has been fired including the added benefit of quickly identifying if a pierced CO<sub>2</sub> cylinder is accidentally refitted to the inflator during the servicing procedure.
- The CO<sub>2</sub> cylinder must be checked each time you don your life jacket to ensure it is tightly screwed in by hand.
- Red indicates it is missing or has been pierced. Partially red indicates the CO<sub>2</sub> cylinder is not screwed in fully.
- THE INDICATOR MUST BE FULLY SHOWING GREEN WITH A FULL CO<sub>2</sub> CYLINDER SCREWED IN HAND TIGHT FOR CORRECT OPERATION.

The Response range of inflatable life jackets come with the latest technology in inflators from UML which in turn supports the latest in Australian standards.

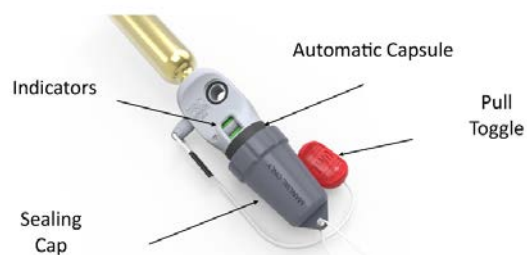

UML is the leading and most trusted inflator throughout the world and is the sole inflator used in all Life jacket Solution inflatables. These UK designed inflators are the gold standard for safety and compliance throughout the world and while many have tried to copy these, none have the safety record and quality control of UML.

When safety and performance is critical to you and your family, chose UML supported inflatables.

### PRO SENSOR SEALING CAP

#### AS4758.1 2015

#### UML Pro Sensor Elite Inflator Fitted with Sealing Cap

- The Pro Sensor Elite Inflator fitted with the sealing cap as shown below will not operate automatically when entering the water even with both indicators showing green. Inflation is achieved by manual operation only. To manually operate pull firmly down on the red pull toggle.
- To return the inflator to automatic operation remove the sealing cap, check the CO<sub>2</sub> cylinder and automatic capsule are correctly fitted and both indicators are fully green.
